Fill in the Memory

memory

address:	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14
value:	3	3	3	5	5	7									

Above address 2-3: **5** Above address 4-5: **7**

```cpp
#include <iostream>
using namespace std;

int main() {
    int a = 3, b = 3, c = 3;

    {
        int a = 5, b = 5;
        c = b;

        {
            int a = 7;
            b = a;
        }
    }

    return 0;
}
```
